YOUNG PRECISION NETWORK

THE YOUNG PRECISION NETWORK (YPN) PROMOTES PRECISION ENGINEERING AND METROLOGY UNDER ENGINEERS

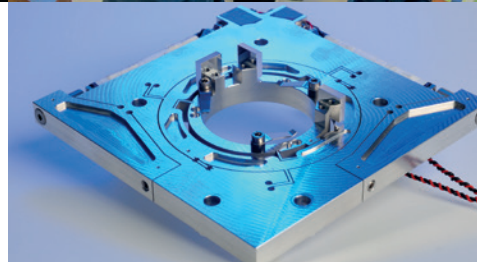

YPN events, including visits to companies active in precision technology, target young professionals and students. Visits combine technical talks, typically high-level talks about recent technological developments, with a tour of a test-facility or work floor. Participation to the visits is free of charge and open to all (young) engineers working in precision technology, as well as students in their final year(s).

Interested?

Send an email to Arjo or Jordan Bos (a.bos@tue.nl or j.bos@tue.nl), chairmen of YPN and PhD Students at Eindhoven University of Technology, and be the first to receive an invitation to YPN events (approx. 5 per year).

Your information will be kept private and you can unregister at any time via a simple email.

So... Don't hesitate and start working on your technical knowledge and network with the Young Precision Network now!
